## THE PREZ SAYS

Hello ET Turners,

It was great seeing **Dan Henry** and his “**Rose Engine Lathe**” demo. His demonstration showed us another innovative way of just how willing turners are to develop and share their ideas with others. Since we, woodturners, are constantly searching for new ways to enhance our turnings, Dan’s demo gave us plenty to think about.

What a fantastic day February 16 turned out to be. Forty-four or so members and visitors braved rain and the threat of severe weather to enjoy a day of learning and teaching the art of woodturning. A great big “**Thank You**” to **Paul Coppinger** for putting this segment of “**Back to Basics**” together. Paul made arrangements to have eight lathes setup, with a mentor on each lathe, and a sharpening station manned by **John Leonard**. Also, “**Thank You**” to **Ken Terrell** for getting the food and soft drinks, to **Bill Holmes** for setting up his membership table and signing up five new members and two renewals and to **Cecil Cox** for bringing in wood.

The most outstanding thing about this day was the camaraderie in this group. Lots of “thank you” and “I appreciate you” was passed around, and I would like to pass along a “**Thank You**” to all that stayed behind to clean up the “good” mess that was made. The clean up is needed after every meeting.

Remember the next meeting date is **March 1**, due to TJC closing for Spring Break. **Tom Criswell** will be presenting the demo, and his “**Three Cornered Bowl from a Cube**” is some-

thing you do not want to miss. Tom always puts on an informative and interesting demo.

Don’t forget the “**OOPS**” Show & Tell for the May meeting. This particular one is different, as you will show & tell about something that did not work out like you had planned, a mistake you made or a mistake by the wood (if that’s possible).

Congratulations to **John Stroud** for being selected to receive the first ETWT scholarship. John will be attending the John C. Campbell Folk School in North Carolina.

Keep a sharp tool and let the chips fly, **Charles**

## I Need Help!

I will be doing the demo in April. The theme is This And That. What I need help with is what This and what That would you like to see? This is your chance to have the demo you want. I plan on doing a number of things, like how to use a hook tool, a different use for a regular bowl gouge, things like that. If there is anything you want to know how to do PLEASE tell me to do This. Let me know by email [ctomsturnings@aol.com](mailto:ctomsturnings@aol.com) or phone 903-288-7378. Your input will be greatly appreciated. **-Tom**

## Setup - Clean-up

What really makes our club unique is the extra time put in by the officers and volunteers. I'll try to explain. First, we have the Steering Committee meeting about ten days before club meeting that normally takes about two-three hours. Second, we all get to TJC close to 8:00 am to get things started. We have to make sure the rooms are unlocked and someone brings in the lathe and library. **Ed & Paul** unload all of the video equipment that **Ed** carries back and forth home as we do not have room to store, then they set that up and that's close to an hours time. **Mike** setups the computer to keep up with Show & Tell pictures, helps with other stuff also. **Tom & Marjorie** arrange the library. **Archie** and **Nancy** bring in the raffle items and setup for the ticket sales and raffle, plus handle all the money and pay bills. **Bill** is there to handle membership duties. **Ken** is working all the time communicating with and lining up demonstrators. Every one on the SC puts in 10 to 15 hours per month working at this because we want to see this club continue to grow and teach woodturning and make this one of the best clubs in America. Then the meeting is over, and all of the above has to be undone, packed and loaded.

All of this is just to say that we need volunteers to help every month with setup and clean up. If six people volunteer each month no one would have to do setup & clean up but once a year or so. I will continue passing around the sign up sheet for you help. In talking to some of the members we have found out that they are just not sure what has to be done during all of this. So the following (at right) is basically what needs to be accomplished. **Cecil Cox** has volunteered to be there each morning and thru clean up to lead this effort.

Thanks for your help regarding setup and clean up. The SC is working on other items and will be seeking volunteers to carry them out. – **Charles**

## Alan Leland Sessions Update

June 9-14, 2008

As of our last club meeting we have filled all five days of the "Hands On" sessions. I noted in last month's newsletter that we would encourage anyone that is interested but not sure they can attend due to scheduling issues, work, family obligations, etc. that could change, to go ahead and get your name on the list. We will fill any vacancies on a first come basis. Anyone paying in advance as an alternate will receive reimbursement if they are unable to be placed as an alternate.

For our new members that may not fully understand the setup of these "Hands On" sessions, please contact **Ken Terrell** (903-839-4735) or **John Leonard** (903-592-6009). As stated previously, this should be an especially great opportunity for beginning turners. – **Ken Terrell**

## Setup – Clean-up Duties

1. Arrive 8:00 AM
2. Soon as the doors are open, move lathe & library into main room.
3. Three people should move three tables to the back of the room, unload the library, (Tom & Marjorie will arrange).
4. Place a tarp on the floor up front and move the lathe into position.
5. While the above is going on, three people should move three tables next to north wall for Show & Tell, and two table to the south wall for viewing Show & Tell pieces. Then get tables covers and place on these tables. Place one table close to lathe for demonstrator use.
6. Once the demo is over, two volunteers should take table covers off and fold.
7. Four volunteers should get the lathe cleaned and moved to back of room and place library cabinet onto lathe. Two volunteers should help load the library. Two volunteers should go back and vacuum the tarp, fold it, and vacuum floor.
8. Table covers and tarp placed in cabinet.
9. Volunteers should put tables and chairs back in place as found.
10. Volunteers should roll lathe into storage room and lock the door.
11. And last: Please stay until this is all accomplished. It's fun to volunteer, and it gives you a chance to visit with each other and make friends with fellow turners.
